

Brian Martensen is the Sr. Program Manager, Quality Products & Services for AIAG. Prior to arriving at AIAG, Brian served as a Quality Manager for Tier 2 suppliers in the stamping, machining, tubing, and export segments of the automotive industry, where he developed and upgraded their Quality Management Systems and resolved multiple repetitive customer quality issues. His career began in maintenance and engineering, with the majority of his career spent with Visteon/ACH as a Manufacturing Engineer and Supplier Quality Engineer. During this time he was part of a team that received a Visteon Quality Award and he received Six Sigma Black Belt training.

Brian is a graduate of the GMI Engineering & Management Institute, where he earned a bachelor's degree in manufacturing systems engineering. His co-op experiences include General Motors, General Mills, and the BASF Corporation.
